

# HAS ERECTILE DYSFUNCTION TURNED YOUR SEX LIFE

If you're struggling with Erectile Dysfunction (ED), you can help researchers evaluate an investigational medication just for ED.

Though it may be difficult to talk about, ED affects nearly 1 in 5 men over the age of 20 in the U.S. This condition can impact not only your sex life, but also your confidence. Now, local doctors are conducting the REVIVE research study to evaluate an investigational medication for treating ED.

**To be eligible for the REVIVE research study, you must:**

- Be 18 years of age or older,
- Have had mild to severe ED for at least 6 months, AND
- Be in a monogamous, heterosexual relationship for at least 3 months.

**Men with type 1 or type 2 diabetes could be eligible and are encouraged to inquire about this research study.**

You will not be allowed to participate in this research study if your partner is pregnant, breast-feeding, or wishes to become pregnant. Qualified participants will receive study medication as well as study-related medical evaluations at no cost. Reimbursement for time and travel may also be provided.
